

NAG Controllers & Consultants B.V. is founded in 1994, under the leadership of Mr. Fred Oldenhuizing by a few accountants and business consultants from different disciplines, with a lot of experience, coming from one of the big-four accountants firms.

Since the firm's establishment in 1994, we have enjoyed dynamic and sustainable growth and excellent business results. An average growth rate of over 15% p.a. since 1995 clearly shows our outstanding development.

Our consultants have a wide range of educational and professional backgrounds, we offer a diverse and international working environment. We continuously strive to pursue success and quality. We depend on the full commitment of all our employees. We respect all people we work with, both clients and NAG employees across all hierarchical levels.

Our values:

Entrepreneurship. Partnership. Excellence. Our consultants are committed to these values. They constitute the foundation of our professional work, our interaction with our clients and our performance culture. We demand compliance with these values and constantly evolve our company according to these beliefs, creating tangible value for our clients, our partnership and our firm.

Our mission:

Creating new perspectives for our costumers through outstanding consultancy, based on integrated business models. NAG is working on a national as well as on an international base.

Disciplines:

- Controlling & Accounting
- Subsidy assistance
- Develop innovative concepts
- Consultancy services for a wide range of industries, trade and other businesses

- Automation services and development
- Project controlling and administration
- Advising
- Project marketing
- Feasibility studies
- Financing structures
- Trade advancement

Our professional principles have shaped the successful development of our firm since its foundation and will remain the basis for the future achievement. Quality and innovation make all the difference to our clients. Motivation ensures our performance. Our reliability makes our clients appreciate and trust us, ethical behaviour, moral action and integrity form the basis for the highest professional standards.

So we think we have an excellent base to start up and form the BDCC in the Netherlands, and we want to make it a success. The combination of our company NAG Controllers & Consultants B.V. and the experience, network and equipment, together with the BBCC in the United Kingdom and their experienced chairman and directors, will make it possible to form a very strong Dutch Chamber in the Netherlands. The network of the total BBCC will increase strongly and we expect to support a lot of business men from Bangladesh, the Netherlands and the United Kingdom, as from other European countries by doing business with one each other. Also we expect to get a better understanding of the cultures from all the countries and to improve the total relationships between the countries and their people.
